

Moxy Professionals, LLC, DBA Ft Myers Art and Beauty Professional Academy

Prospective Students:

FAB Professional Academy: Cosmetology, Barbering, Full Specialist, Facial Specialist and Nail Technology – all meet Florida's requirements for licensing for that specific profession.

The laws and requirements for Cosmetology licensing vary by state. Also, the rules for reciprocity, which is a type of transfer that means another state will allow you to work utilizing the license of your current state, also vary.

Other things that vary are a transfer, when a state other than your home state of licensure allows you to perform cosmetology services legally, renewal schedules, fees, regulations and continuing education requirements.

State Authorization is the determination by a higher education agency Florida Department of Education's Commission for Independent Education. If you plan to work in another state, outside of Florida, you may have to meet additional requirements to be licensed in that state. These requirements are subject to review and updates, as they may change from time to time. If you plan to transfer your Florida license to another state, you will need to contact the licensing agency in that state.

FAB Professional Academy can provide you with a list of state licensing contacts and information upon request.
